**You know  
them,  
You love  
them,  
So help them!**

Kash was born with a rare disease called X-linked Myotubular Myopathy. He is unable to walk, talk or roll over and requires a ventilator to help him breath. But that does not stop him! He also has a port in his stomach enabling him to receive his nutrients. He cannot swallow food and his liver cannot break things down. Despite all of these challenges, he is like most other 4 year olds; he loves to play, read, and watch movies and loves music! Unlike most other 4 year olds, this special little boy has had to develop bravery, patience and a fortitude that a lot of people don't develop in a lifetime. The people who know and love Kash describe the gratitude that they feel, like they have an actual angel in their midst.

He needs our help with some vital medical equipment. Will you do ANYTHING FOR A FRIEND?
